📍 **Home:** Sevilla (Spain)

ABOUT ME

Software Engineer and Geographical Information Systems (GIS) Specialist. Expert in SQL, Python, ETL and database modelling, designing scalable architectures to transform complex data into strategic value, and building robust solutions that drive decision-making and deliver measurable results.

WORK EXPERIENCE

🏢 *Nter Tech Services* – Sevilla, Spain

Website: <https://nter.es/> | Name of unit or department: Data & BI - Business or sector: Professional, scientific and technical activities

Software Engineer

[15/09/2025 – Current]

Responsibilities include developing and maintaining database solutions, ensuring high data quality through structured validation processes within scalable workflows, and providing technical support to clients.

🏢 *IdenCity* – Spain

Website: <https://www.idencityconsulting.com/en/> | Name of unit or department: GIS - Business or sector: Professional, scientific and technical activities

Geospatial Data Engineer

[01/07/2025 – 15/10/2025]

- Build, process, and validate geospatial datasets across multiple spatial scales
- Design efficient and scalable ETL pipelines to transform and manage complex geospatial data
- Deliver reproducible Python workflows (GeoPandas, ORS) with fully documented code
- Develop accessibility isochrones for urban facilities using population-based criteria
- Produce high-quality geospatial outputs to support informed spatial planning and decision-making

🏢 *Ministerio de Ciencia, Innovación y Universidades* – Spain

Website: <https://www.ciencia.gob.es/> | Business or sector: Professional, scientific and technical activities

Geospatial Data Engineer

[30/11/2021 – 01/04/2025]

- Development of relational databases using PostgreSQL
- Creation and implementation of web mapping applications with Leaflet
- Generation and management of RDF and INSPIRE-compliant metadata
- Design and maintenance of online databases using Bootstrap Table, HTML5, and CSS3
- Statistical and spatial analysis using the R programming language
- Data management and analysis with Pandas and NumPy in Python
- Spatial data processing with GeoPandas in Python
- Data visualisation using Matplotlib and Seaborn in Python

- Large-scale data processing in Snowflake using advanced SQL, with a focus on cleaning, transforming, and efficiently modelling datasets
- University teaching experience in Computer Applications and Statistics

EUROPEAN COMMISSION – Spain

Website: https://commission.europa.eu/index_en | **Business or sector:** Professional, scientific and technical activities

Geospatial Data Engineer

[15/10/2020 – 30/11/2021]

The project aims to convert archaeological data from the Iberian Peninsula into a Spatial Data Infrastructure (SDI) in compliance with the European Union's INSPIRE interoperability guidelines.

The development of the SDI includes the following activities:

- Design of a Spatial Data Infrastructure (SDI)
- Database processing and modelling, including data cleansing and organisation
- Design and integration of the database model: After processing and standardising the data, developed the data model that supports and feeds the geoportal
- Design and implementation of a relational database model to handle complex and large-scale datasets
- Integration of alphanumeric and geographic data in PostgreSQL/PostGIS databases, and processing of spatial information using GIS.
- Design and development of the geoportal and various internal tools for data consumption and visualisation
- Testing and validation of the overall system functionality
- Data organisation, analysis, processing, and normalisation
- Implementation of routines and automation of network analysis using the SoNIA library in R, and the development of Shiny applications for network analysis, geovisualisation tools (geo-viewers), and database interaction

Evenor-Tech – Spain

Website: <https://evenor-tech.com/> | **Name of unit or department:** GIS - **Business or sector:** Professional, scientific and technical activities

GIS Technician

[01/01/2020 – 01/06/2020]

Participation in the CONSOLE project (Contract Solutions for Effective and Lasting Delivery of Agri-Environmental-Climate Public Goods by EU Agriculture and Forestry):

- Performed statistical analyses using SPSS and R
- Prepared and wrote scientific and technical reports
- Conducted spatial analysis and mapping using ArcGIS and QGIS
- Managed and maintained databases, ensuring data accuracy and accessibility
- Supported project development through the research and analysis of bibliographic references

Ministerio de Educación y Formación Profesional – Spain

Website: <https://www.educacionfpydeportes.gob.es/ministerio.html> | **Business or sector:** Professional, scientific and technical activities

GIS Technician

[01/09/2019 – 01/06/2020]

- Digitised and mapped protected natural areas in Andalusia (Spain) using GIS platforms such as QGIS and ArcGIS

Geographica - CARTO – Spain

Website: <https://carto.com/> | **Name of unit or department:** GIS and web development - **Business or sector:** Professional, scientific and technical activities

GIS Technician

[01/03/2019 – 01/07/2019]

Participation in the URBAN AUDIT project:

- Edited, corrected, and updated spatial data files in various formats using GIS software
- Managed and analysed spatial databases using SQL for geospatial data extraction and processing

EDUCATION AND TRAINING

MSc in Geography

Universidad de Sevilla [15/10/2019 – 31/07/2020]

City: Sevilla | Country: Spain | Website: <https://www.us.es/> | Field(s) of study: Geospatial Technology

Master's degree in GIS, focused on spatial database design, management, and geospatial data analysis. Skilled in geo-dissemination through the development of web-based GIS services and clients for interactive geospatial visualization.

BSc in Geography

Universidad de Sevilla [15/09/2015 – 31/07/2019]

City: Sevilla | Country: Spain | Website: <https://www.us.es/> | Field(s) of study: Geospatial Technology

Bachelor's degree in Geography and Geographic Information Systems (GIS), with an emphasis on spatial database development and SQL-based geospatial data analysis and visualization.

SKILLS

Database Administration / PostgreSQL / pgAdmin / Data Modeling / DBeaver / Visual Studio Code / Data Governance / Distributed Computing / Apache Spark / PySpark / Databricks / DuckDB / Snowflake / Data Pipeline Development / Data curation / Geospatial Data Engineering / GeoPandas / ArcGIS / QGIS / PostGIS / Leaflet / SQL Optimization / Oracle SQL Developer / Python for Data / Pandas / NumPy / Data visualization / Matplotlib / Plotly / Jupyter Notebook / R for Data Analysis / RStudio / ggplot2 / Shiny for R / NoSQL Databases / MongoDB / Shell Scripting / Bash / Semantic Web Technologies / Semantic Metadata / Metadata Management / Technical Documentation / Data-Driven Decision Making / Version Control / Git / GitHub / Team Collaboration

LANGUAGE SKILLS

Mother tongue(s): Spanish

Other language(s):

English

LISTENING C1 READING C1 WRITING C1

SPOKEN PRODUCTION C1 SPOKEN INTERACTION C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DRIVING LICENCE

Driving Licence: B
