📍 **Home:** Sevilla (Spain)

ABOUT ME

As a Software Engineer and Geospatial Data Specialist, I have expertise in ETL workflows, SQL, Python, database modelling, and cloud services. I design scalable data architectures and leverage cloud technologies to transform complex datasets into actionable insights. Dedicated to building robust, efficient, and scalable solutions, I focus on enabling data-driven decision-making to deliver measurable results.

WORK EXPERIENCE

🏢 **Nter Tech Services** – Sevilla, Spain

Website: <https://nter.es/> | **Name of unit or department:** Data & BI - **Business or sector:** Professional, scientific and technical activities

Software Engineer

[15/09/2025 – Current]

- Develop and maintain database solutions, implement data quality validation processes, and optimise scalable data workflows to ensure data consistency, reliability, and integrity.
- Develop Machine Learning models to assess and predict physical climate risks associated with banking products, supporting climate risk assessment and data-driven decision-making.
- Leverage AWS cloud services, including Amazon S3 for data storage and management and Amazon SageMaker for advanced analytics and Machine Learning workflows.
- Use JupyterLab, Apache Spark, and PySpark to process, transform, and analyse large-scale datasets for climate risk modelling.
- Contribute to scalable data processing pipelines and predictive analytics workflows to support the assessment of climate-related physical risks and their potential impact on financial portfolios.

🏢 **IdenCity** – Spain

Website: <https://www.idencityconsulting.com/en/> | **Name of unit or department:** GIS - **Business or sector:** Professional, scientific and technical activities

Geospatial Data Engineer

[01/07/2025 – 15/10/2025]

- Build, process, and validate geospatial datasets across multiple spatial scales
- Design efficient and scalable ETL pipelines to transform and manage complex geospatial data
- Deliver reproducible Python workflows (GeoPandas, ORS) with fully documented code
- Develop accessibility isochrones for urban facilities using population-based criteria
- Produce high-quality geospatial outputs to support informed spatial planning and decision-making

🏢 **Ministerio de Ciencia, Innovación y Universidades** – Spain

Website: <https://www.ciencia.gob.es/> | **Business or sector:** Professional, scientific and technical activities

Geospatial Data Engineer

[30/11/2021 – 01/04/2025]

- Development of relational databases using PostgreSQL
- Creation and implementation of web mapping applications with Leaflet
- Generation and management of RDF and INSPIRE-compliant metadata
- Design and maintenance of online databases using Bootstrap Table, HTML5, and CSS3
- Statistical and spatial analysis using the R programming language
- Data management and analysis with Pandas and NumPy in Python
- Spatial data processing with GeoPandas in Python
- Data visualisation using Matplotlib and Seaborn in Python
- Large-scale data processing in Snowflake using advanced SQL, with a focus on cleaning, transforming, and efficiently modelling datasets
- University teaching experience in Computer Applications and Statistics

EUROPEAN COMMISSION – Spain

Website: https://commission.europa.eu/index_en | **Business or sector:** Professional, scientific and technical activities

Geospatial Data Engineer

[15/10/2020 – 30/11/2021]

The project aims to convert archaeological data from the Iberian Peninsula into a Spatial Data Infrastructure (SDI) in compliance with the European Union's INSPIRE interoperability guidelines.

The development of the SDI includes the following activities:

- Design of a Spatial Data Infrastructure (SDI)
- Database processing and modelling, including data cleansing and organisation
- Design and integration of the database model: After processing and standardising the data, developed the data model that supports and feeds the geoportal
- Design and implementation of a relational database model to handle complex and large-scale datasets
- Integration of alphanumeric and geographic data in PostgreSQL/PostGIS databases, and processing of spatial information using GIS.
- Design and development of the geoportal and various internal tools for data consumption and visualisation
- Testing and validation of the overall system functionality
- Data organisation, analysis, processing, and normalisation
- Implementation of routines and automation of network analysis using the SoNIA library in R, and the development of Shiny applications for network analysis, geovisualisation tools (geo-viewers), and database interaction

Evenor-Tech – Spain

Website: <https://evenor-tech.com/> | **Name of unit or department:** GIS - **Business or sector:** Professional, scientific and technical activities

GIS Technician

[01/01/2020 – 01/06/2020]

Participation in the CONSOLE project (Contract Solutions for Effective and Lasting Delivery of Agri-Environmental-Climate Public Goods by EU Agriculture and Forestry):

- Performed statistical analyses using SPSS and R
- Prepared and wrote scientific and technical reports
- Conducted spatial analysis and mapping using ArcGIS and QGIS
- Managed and maintained databases, ensuring data accuracy and accessibility
- Supported project development through the research and analysis of bibliographic references

Ministerio de Educación y Formación Profesional – Spain

Website: <https://www.educacionfpydeportes.gob.es/ministerio.html> | **Business or sector:** Professional, scientific and technical activities

GIS Technician

[01/09/2019 – 01/06/2020]

- Digitised and mapped protected natural areas in Andalusia (Spain) using GIS platforms such as QGIS and ArcGIS

 **Geographica - CARTO – Spain**

Website: <https://carto.com/> | Name of unit or department: GIS and web development - Business or sector: Professional, scientific and technical activities

GIS Technician

[01/03/2019 – 01/07/2019]

Participation in the URBAN AUDIT project:

- Edited, corrected, and updated spatial data files in various formats using GIS software
- Managed and analysed spatial databases using SQL for geospatial data extraction and processing

EDUCATION AND TRAINING

MSc in Geography

Universidad de Sevilla [15/10/2019 – 31/07/2020]

City: Sevilla | Country: Spain | Website: <https://www.us.es/> | Field(s) of study: Geospatial Technology

Master's degree in GIS, focused on spatial database design, management, and geospatial data analysis. Skilled in geo-dissemination through the development of web-based GIS services and clients for interactive geospatial visualization.

BSc in Geography

Universidad de Sevilla [15/09/2015 – 31/07/2019]

City: Sevilla | Country: Spain | Website: <https://www.us.es/> | Field(s) of study: Geospatial Technology

Bachelor's degree in Geography and Geographic Information Systems (GIS), with an emphasis on spatial database development and SQL-based geospatial data analysis and visualization.

SKILLS

Database Administration / PostgreSQL / pgAdmin / Data Modeling / DBeaver / Visual Studio Code / Data Governance / Distributed Computing / Apache Spark / PySpark / Databricks / Amazon Web Services / DuckDB / Snowflake / Data Pipeline Development / Data curation / Geospatial Data Engineering / GeoPandas / ArcGIS / QGIS / PostGIS / Leaflet / SQL Optimization / Oracle SQL Developer / Python for Data / Pandas / NumPy / Data visualization / Matplotlib / Plotly / Jupyter Notebook / R for Data Analysis / RStudio / ggplot2 / Shiny for R / NoSQL Databases / MongoDB / Shell Scripting / Bash / Semantic Web Technologies / Semantic Metadata / Metadata Management / Technical Documentation / Data-Driven Decision Making / Version Control / Git / GitHub / Team Collaboration

LANGUAGE SKILLS

Mother tongue(s): Spanish

Other language(s):

English

LISTENING C1 READING C1 WRITING C1

SPOKEN PRODUCTION C1 SPOKEN INTERACTION C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DRIVING LICENCE

Driving Licence: B
